I have been a member of [REDACTED] for two years. My first year in [REDACTED] I placed third in Business Finance at my district competition allowing me to compete at the state level. This year I placed first in marketing communications at district, third in marketing communications at state, and was able to compete amongst the top competitors at the international level. I have been a member of my school's History Academic Superbowl team for two years. Last year we placed first and this year we placed second among the schools in our district. I am a member of National Honor Society. I was also a part of my schools JV and Varsity volleyball teams for two years. I was in German Club for one year. I have maintained a high enough GPA to be able to attend my school's academic awards banquet all four years of my high school career.

Professional and Career Goals

I plan to attend [REDACTED] to obtain a Bachelor's degree in accounting.

Mathematics has always been my biggest strength in school and I have always known I wanted to use that skill in my future career. Accounting sparked my interest because I was able to take an accounting course during my junior year in high school. I found this course challenging, but also interesting and useful in growing my knowledge in business mathematic topics. During my junior year I also joined [REDACTED] a business-based group that helps students connect to the real business world. My experience within this group has greatly strengthened my passion for business and the topics that surround accounting. Through [REDACTED] I have networked with other business students and professionals in the business world. I have been able to compete in two different [REDACTED] events at the state level and had the opportunity to compete at the international level in April. I am also currently an intern in the accounting office at [REDACTED]. This experience has allowed me to gain more knowledge of the day-to-day tasks of accounting. All of these experiences have led me to develop large academic, professional, and career goals. In college, I plan to focus my all of my energy and efforts on building my knowledge in the many sectors of business and finding success working with new peers and professors. I plan to do this by staying on top of my academic commitments and working hard to create strong relationships with those around me. I also hope to gain leadership skills as I work in new groups and join a variety of campus clubs. I plan to work on effective communications skills, as well as strengthening my public speaking skills. I will be able to accomplish these goals by taking different business and public speaking classes. I hope to navigate my occupational options by interning with several different companies, within several different areas of work. My goal is to hopefully connect with a company within my internship program and be contracted to work for them full time. Overall my goals are to maintain high grades throughout college, excel in my course work, connect with my new peers, establish strong relationships with my professors, network with different companies, and work my way into a successful career within the business world.
